⁽¹⁾ PCA Charge applied to all rate classes.

#### Power Cost Adjustment Rider All Rate Classes Effective January 1, 2020

#### Applicable:

The calculation of monthly bills pursuant to the rates and charges therein shall be subject to adjustment for changes in the cost of fuel and purchased power by applying a Power Cost Adjustment (PCA) as a unit charge or credit to the total billed energy kilowatt-hours (kWh) on the bill.

#### Overview:

This PCA calculation is intended to be based on forward looking projections of fuel, purchased power and other power supply related costs, as well as projections of customer sales (kWh), for the period. The calculation is further intended to be performed at a minimum six month interval or more frequently, if required, to accomplish recovery of fuel related cost in a timely manner. The calculation includes a provision to reconcile over or under collection of cost from previous periods based on actual cost versus projected cost for the period.

The PCA calculation shall be performed in a manner consistent with this rider and initially applied for a seven-month period effective for billings after December 31, 2019. Thereafter, the PCA calculation shall be reviewed at a minimum every six months. The PCA calculation shall be reviewed and new projections shall be made for the subsequent six-month periods (i.e., August and February of each year). Following such PCA review and calculation, the PCA shall be applied, as deemed necessary to accomplish recovery of the fuel, purchased power and other power supply related costs in a timely manner. The PCA shall be recalculated and applied at intervals more frequent than six months if actual fuel and purchased power cost vary significantly from projections.

#### Definition of Fuel Cost:

The cost in dollars and cents of all projected fuel used in the production of electric energy during the applicable time period determined from the projected weighted average cost of such fuel applied to the projected quantity used. The projected weighted average cost of fuel as used shall be defined as the cost of fuel consumed in generating facilities priced at cost including freight, demurrage, and taxes, of fuel on hand at the beginning of the applicable time period, plus projected cost of fuel received during the applicable time period, divided by the total quantity of fuel on hand and projected to be received.

#### Definition of Purchased Power Cost:

The net cost in dollars and cents of all projected purchased power required during the applicable time period. The net cost of purchased power shall be the projected total cost of power and energy received from suppliers, including service and dispatch fees and any power supply related charges, less the projected amounts received for off-system sales of energy.

#### Determination of PCA Unit Charge or Credit:

When fuel total cost and purchased power cost increases above or decreases below \$0.09506/kWh-sold, the rate for electric service shall be increased or decreased in accordance with the following formula:

$$P + R$$

$$PCA = \dots - B$$

Where:

- PCA = Power Charge factor, expressed in dollars per kWh-sold rounded to the nearest five decimal places.
- P = Total projected fuel cost and projected purchased power cost during the applicable time period expressed as dollars (\$) as defined in this schedule.
- S = Projected sales (kWh) excluding wholesale energy sales, for the applicable time period for which the fuel cost and purchased power cost (P) is computed.
- R = Reconciliation of the actual cumulative over or under recovery of fuel cost and purchased power cost from preceding applicable time periods including over or under recovery of fuel cost and purchased power cost before the effective date of this Rider expressed as dollars (\$).
- Base power supply cost for the schedule of rates and charges provided by this Ordinance, B shall be \$0.09506/kWh-sold.

On June 3, 2019 a 1st Continuation of this Initial Agreement was executed for an additional fee capped at \$15,000. This cap has now been reached. DDA and the City hereby agree to continue the Initial Agreement by this 2nd Continuation of the Initial Agreement with a cap not to exceed \$15,000.

This 2nd Continuation of the Initial Agreement will include the following <u>scope of services</u>: (1) continuing the development of additional concept site plans; (2) refining and enhancing several select concept site plans for promotional presentations; (3) preparing promotional information for select concept site plans; (4) seeking out interested parties for development of the sites; (5) working with the City and other agencies to gain some form of control of select sites for development; (6) working with the City in developing incentives to promote development with major trip destination uses; (7) assisting the City with future annexations; and (8) other development services as needed.
