

WILL THE T-10 RF TRANSMITTER INTERFERE WITH MEDICAL OR ELECTRONIC DEVICES IN MY HOME?

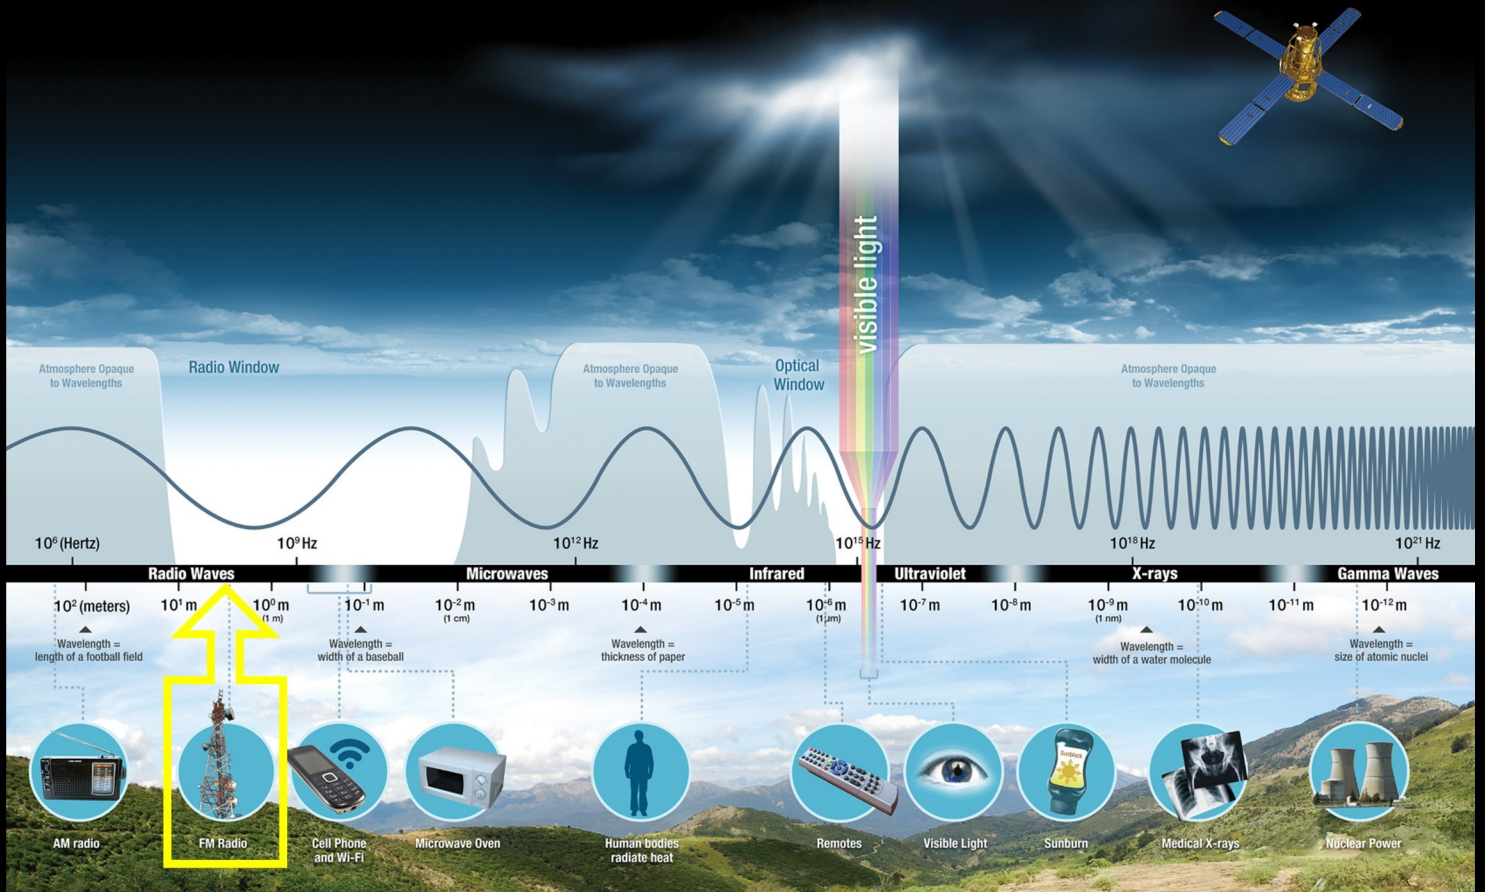

The Neptune T-10 water meter will not interfere with your cell phones, security systems, pacemakers, or other similar RF devices.

Devices like this have been in use in the USA for more than 15 years.

NEPTUNE
TECHNOLOGY GROUP

A millisecond is one thousandth of a second. Your Neptune T-10 water meter will transmit a FM signal several times a day to a remote receiver in short bursts of 100 milliseconds or less.

These bursts total less than one second of actual transmission time per day.

To put that in perspective the average eye blink lasts only about a tenth of a second or 100 milliseconds.
